

Remote Backup Service – Data Warehouse Package

www.drbackup.net

If for any reason you are not absolutely delighted with the ease-of-use, safety or convenience of our service -- please let us know immediately. We will either fix the issue or refund 100 percent of your monthly service fee.

For clients that want the security of online backup for **more than 20 GB** of compressed data storage, and **are flexible in the scheduling of their backups**, our **Data Warehouse Package** allows the backup of larger quantities of data at a substantially discounted price.

The Data Warehouse Package includes Microsoft Windows®-compatible backup software for use on one (1) PC, laptop or server. Additional PCs can be added to the service package as sub-account(s) with disk storage ‘pooled’ across all devices. Users can perform an unlimited number of backups and restorations using any broadband Internet connection **subject to the tiered storage usage conditions listed below.**

Service Description	Per Month	Per Month 1-YR Prepaid*
Data Warehouse Package (RBS-DW-001) Bulk data storage service for business. Includes one (1) software license and 20,000 MB (20 GB) of compressed server storage. Add additional Tier-1 or Tier-2 compressed storage as required.	\$57.95	\$52.15
Additional PC (sub-account) (RBS-ID-001) Add PCs by purchasing additional software licenses. Disk storage ‘pool’ is shared by all systems in the plan.	\$5.00	\$4.50
* Includes a 10% prepaid annual contract discount.		

Additional Storage	Per month	Per Month 1-YR Prepaid*
10 GB of Compressed Tier-1 Supplemental Storage - (RBS-DS-010) Add 10 GB additional storage to your Data Warehouse Package. Backups restricted to maximum of 5,000 MB of raw user data per day.	\$10	\$9
10 GB of Compressed Tier-2 Supplemental Storage - (RBS-DS-020) Add 10 GB additional storage to your Data Warehouse Package. Backups restricted to the hours of 8:00am – 6:00pm eastern time zone.	\$5	\$4.50

Frequently Asked Questions

Data Warehouse Package

1. What's the advantage of the Data Warehouse Package?

The Data Warehouse Package offers businesses with large amounts (more than 20GB) of important data (digital pictures, x-ray imagery, audio, video, digital records, etc.) the opportunity to transfer this data to our offsite storage servers at a significantly discounted rate.

2. How can you offer such low prices for large quantities of data?

Most Dr.Backup clients perform their critical data backups at night. This means that during the daylight hours, our network and server resources have significant unused capacity. Clients that backup during the day - or limit the amount of critical data files they send us each night - lower our cost of doing business. We pass these operational cost savings along to you in the form of reduced storage fees associated with our Data Warehouse Package.

3. We actively use our computer systems during the day. Is it still ok to run a backup?

In many cases, especially with newer computer equipment, your backups will run silently in the background. You may not even be aware a backup is in progress. Our open file agent technology permits you to work on files during the day – yet still get a snapshot backup of those data files that are currently in use.

4. What happens if we try to send you too much data in one night or our backups cannot be completed during daylight hours?

When your Data Warehouse Package is provisioned, **we configure backups to run between the hours of 8am and 6pm eastern time - or - we limit the amount of raw data eligible for backup at night.** If a backup is in progress past 6pm, the current file being transferred to our servers will complete. The backup will then terminate. Files which were not backed up today will most likely back up tomorrow. If your backup jobs do not regularly complete in the designated window, then you may want to consider getting a faster Internet connection or otherwise reduce the amount of storage you attempt to backup each day.

5. Do I still get business-class service and support with the Data Warehouse Package?

Absolutely. Technical support hours are from 8am to 7pm eastern time. Emergency after-hours data restore assistance is available from an on-call technician.

6. What happens if over time, I need additional storage?

Accounts which exceed their storage allocation receive an automatic 10% overdraft at no charge. If this amount is exceeded for over 30 days, we will ask you to upgrade your Tier-1 or Tier-2 bulk storage plan or reduce the size of your backups. Clients that prepay their annual service can receive additional storage by paying a pro-rata fee.
